Education

McGill University , BSc in Computer Science	Sept 2025 – May 2027
McGill University , BSc in Honours Psychology, Minor in Computer Science	Sept 2022 – May 2025
• GPA: 3.97/4.00	

Experience

Research Assistant , Otto Lab – McGill University	Sept 2023 – Sept 2024
- Designed and implemented a web-based psychological paradigm using the MERN stack, enabling efficient measurement of time-on-task effects on affect and performance. - Conducted behavioral data collection and analysis for a strenuous-task experiment, contributing to an honours prospectus examining affective and performance changes over time.	
Full Stack Developer Intern , Spartakus Technologies – Kirkland, QC, CA	May 2026 –
•	

Projects

Latent Semantic Analysis	github.com/LSA
- Implemented my own version of Latent Semantic Analysis in Python (writeup on GitHub) - Trained on Wikitext-103, a dataset of over 100 million tokens - Tools Used: Python, Sklearn, Scipy	
Spaceship Paradigm	github.com/js_spaceship
- Built a full-stack MERN application for a McGill psychology lab, enabling automated measurement of cognitive fatigue and affect across extended time-on-task sessions. - Used MongoDB to store behavioral and affective data for pilot participants. - Tools Used: MERN full-stack	
License Plate Recognition & Reading	github.com/ALPR
- Trained a YOLOv11 object detection model achieving 95% recall on cluttered real-world license plate images, enabling robust downstream OCR. - Trained a Bidirectional CRNN to read license plate characters with 80% character accuracy. - Tools Used: Python, Sklearn, PyTorch, cv2	

Skills

Languages: C, C++, Java, Python, JavaScript, Lua, SQL, OCaml, Bash, MIPS Assembly, HTML/CSS

Frameworks & Libraries: PyTorch, Transformers, React, Node.js, Unity, LÖVE2D

Technologies: MongoDB, Express, Git, Linux
